**PEAK
 PERFORMANCE
 CLUB**

To get the maximum performance from your equipment year round, we'll service it twice a year—once in the spring to ensure your cooling system is ready for the summer, and once in the fall to ensure your heating system is ready for the winter.

CLUB BENEFITS

- Lower energy bills
- Extend equipment life
- Fewer repairs
- Improved capacity and efficiency
- Priority client status which includes priority service during and outside of regular business hours
- No overtime charges

PRECISION TUNE-UP PROCEDURES INCLUDES

- Check and tighten all loose electrical connections
- Adjust air flow for proper temperature rise/fall
- Check heat strips to ensure proper working order
- Check primary and secondary drains
- Clean and check condenser coil
- Clean and check evaporator coil
- Lubricate all moving parts (where applicable)
- Check operating pressures and refrigerant charge
- Monitor voltage and amperage draw on all motors
- Clean and check thermostats
- Monitor air conditioning cycle
- Monitor heating cycle
- Make recommendations for improvement
- Visually inspect duct work
- Check all electrical parts and components
- Change filters that client provides
